TECHNICAL SKILLS

FRONTEND

Angular 2+, AngularJS, React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind

BACKEND

Node.js, Express.js (Basics), REST APIs, JSON, SQL, MongoDB

ARCHITECTURE

MVC, MVVM, SPA, Reactive Forms

STATE MANAGEMENT

RxJS, Angular Signals, Hooks, Context API, NgRx

TESTING & BUILDS

Jasmine, Karma, Webpack, Gulp.js, Grunt.js

TOOLS

Git, GitLab, VS Code, Postman, Chrome DevTools

EDUCATION

Master of Computer Applications (MCA)

Mepco Schlenk Engineering College
Graduated: 2021 | CGPA: 9.02

CODING PROFILES

HackerRank

[Angular, JS, SQL, CSS Certified](#)

LANGUAGES

Tamil

— Native

English

— Upper Intermediate

SUMMARY

Full Stack Developer with 4+ years of professional experience building scalable, responsive, and secure enterprise web applications. Highly skilled in building modular frontend architectures with Angular 13+ and Node.js, managing complex asynchronous workflows using RxJS/AJAX, and implementing strict role-based security configurations for government-grade platforms.

PROFESSIONAL EXPERIENCE

Senior Angular Developer

Oct 2022 – Present

NIC (via Silvertouch Technologies Ltd.)

- Designed and optimized scalable enterprise applications using Angular 10+, TypeScript, and Node.js following MVVM/MVC principles.
- Implemented secure JWT-based authentication and Role-Based Access Control (RBAC) via Angular Route Guards.
- Improved core application performance by ~30% through the implementation of Lazy Loading and asset bundling with Webpack.
- Managed highly complex asynchronous request handling, partial page updates, and event data flows using RxJS and AJAX.
- Engineered responsive, cross-browser compatible forms and multi-step workflows utilizing Angular Material and Reactive Forms.
- Conducted automated unit testing using Jasmine and managed client-side profiling using Chrome DevTools within Agile sprints.

Angular Developer

Oct 2021 – Sept 2022

NIC (via Akal Information Systems)

- Developed and maintained secure, large-scale public sector web interfaces with complete cross-browser layout stability.
- Migrated legacy AngularJS / Angular systems to modern versions, optimizing code modularity and stability.
- Built complex, nested validation multi-step workflows using the Angular Material Stepper framework.

KEY PROJECTS

FSIS – Foreign Student Information System

- Developed dashboard visualization analytics and student registration workflows with role-based visibility conditions using Reactive Forms.

eFRRO Online Portal

- Built and tuned dynamic workflow steps with real-time conditional data validation for a high-traffic visa services application using RxJS.
